If you are selecting a smart price plan for the first time, your meter will be reconfigured so that your supplier will receive a minimum of three-meter reads (day/night/peak). This change cannot be reversed. The frequency of these reads will depend on the smart price plan that you have selected and/or any consent you may have given.

In line with the National Smart Meter Rollout plan, smart gas meters will only be integrated in Phase 3. Until that point, Smart Services will only be available to electricity customers who have had a smart meter installed and signed up to a smart price plan. Dual Fuel customers will still be subject to existing gas terms and conditions until their meter has been upgraded.

If the signal from your meter is not sufficient, or becomes insufficient, to support the transfer of half-hourly data, we will contact you to discuss other suitable products.

Product Terms and Conditions

- This contract has a 12-month contract term from date of sign up.
- You must hold an electricity and gas account for the full 12-month contract term.
